

VPS Specification for Travel Partners

Version 1.9 - June 2025

Document Control

Document Name: VPS Specification for Travel Partners

Version	Status	Date	Author(s)	Summary of changes
1.0	Initial Draft	4/19/2023	VPS Team	Initial creation of document.
1.1	Draft	5/23/2023	VPS Team	Decrease margins for Appendix B (Sample requests and responses)
1.2	Approved	6/7/2023	VPS Team	Group Pricing Service, Promotion Details, Price Change Identifications, and Sailing Package Changes added. Header and footer added.
1.3	Revised	7/31/2023	VPS Team	Added Sailing Package Duration and Cruise Only Flag for Sailing Package Response in Appendix A. Added Brand for Promotion Detail Request in Appendix A. Added Occupancy Restriction in Promotion Detail Response in Appendix A. Added Client, Pricing Preference and Guest Preference for Partner Pricing Requests in Appendix A. Corrected Agency ID in Sailing Package Change Request in Appendix A. Transferred Sample Request and Responses to a separate file. Updated corresponding links. Formatting updates for table sizes.
1.4	Revised	9/22/2023	VPS Team	Updated Promo Detail Response Schema (<u>12.10 Promotion Details</u>) to include 'agencyTypes', for Net Rate and Interline Promotions. Super Category Pricing & Category Pricing now include Agency specific promotions, Net Rates and Interline Rates for best rate calculation and promotional grouping, if applicable and eligible.
1.5	Revised	10/20/2023	VPS Team	<u>Special Design Considerations</u> – Pass additional header field for response compression. <u>Sailing Package Request Specifications</u> – Updated to indicate 'brandCode' as a required field.
1.6	Revised	12/15/2023	VPS Team	Updated the Yaml File / Schema URL for all services. Added note regarding Air_addon and Airwaves_package being out of scope for VPS. Corrected the endpoint for Promotion Detail.
1.7	Revised	01/17/2024	VPS Team	Updated sample value for Company Shortname in Partner Pricing requests.
1.8	Revised	06/15/2024	VPS Team	Added Appendix C for Enhancements 2024. Formatting updates.
1.9	Revised	06/12/2025	VPS Team	Added Voyage Type for Sailing Package Response. Updates Special Design Considerations with suggestion to not enforce strict JSON Schema validation.

1 General

1.1 Purpose

The purpose of the document is to introduce VPS Product and its services. These services will enable partners to integrate for sailing and pricing needs during the shopping process. The goals of this document are to:

- Describe the purpose of each service.
- Describe functional and non-functional aspects of each service.
- Call out special design considerations, where applicable.

1.2 API Connectivity

Partners can consume VPS APIs over https. These are REST services exposed over the public internet. Partners will be provided with an AppKey and API endpoints to invoke these APIs.

1.3 VPS Definition

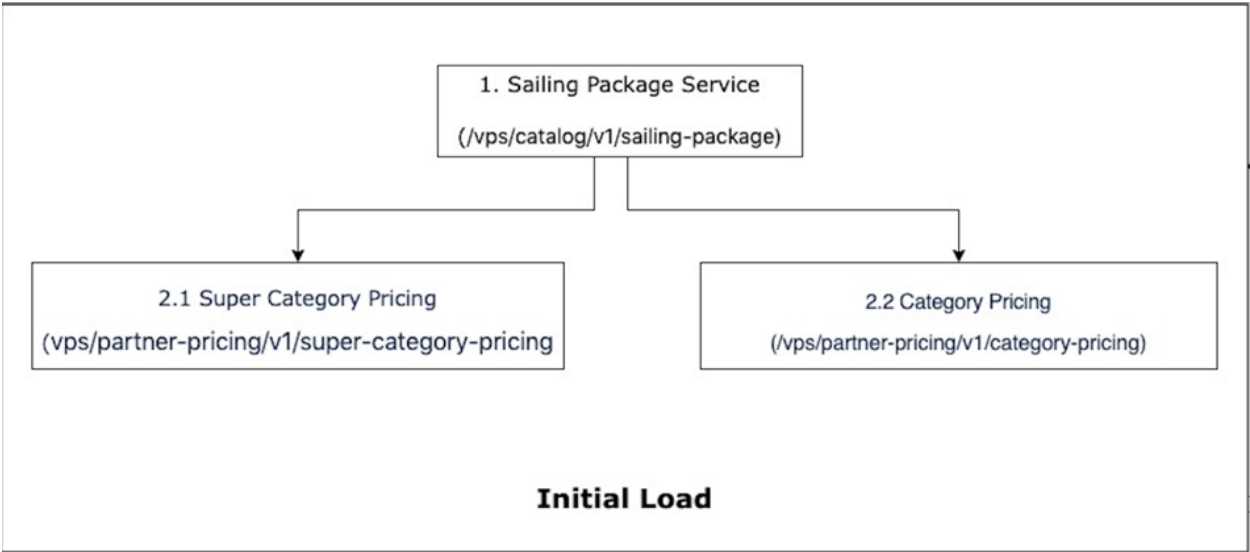

Vacation Pricing & Search (VPS) is a microservice application, that provides near real-time pricing for caching by Travel Partners for a given sailing, package, and market. This enables the ability to provide guests with a better shopping experience.

Services:

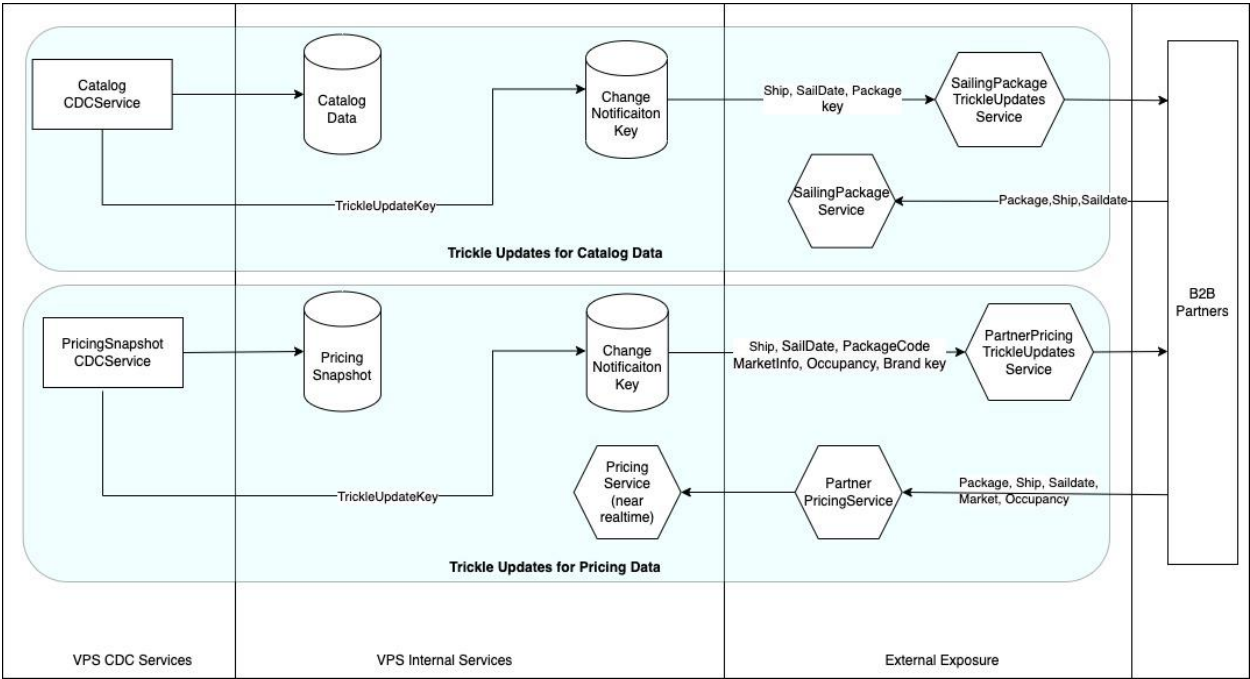

- Sailing Package
- Category Pricing
- Super Category Pricing
- Group Pricing
- Promotion Details
- Price Change Identifications – Category
- Price Change Identifications – Super Category
- Sailing Package Changes

The current RCG brands supported: Royal Caribbean International and Celebrity Cruises.

1.4 Flows

Notification Flow

1.5 System Testing

The RCG test environment resides within a separate infrastructure than the one used for the live production environment. Test data will be seeded with an extract of production data and may not be a true representation or exact copy of production scenarios. Due to the changing nature of test

inputs, the validity of test scenarios will be the responsibility of the testers involved.

1.6 Service List

Service Name	Service Description
Sailing Package	This service provides a list of all sailings and packages available with relevant details. This service can also be invoked to get the details for a specific sailing and package.
Category Pricing	Category pricing service provides the pricing details for each of the available categories for a given sailing and package. Service provides the following: • Best Rate/Best Value at an individual category level. • Pricing based on restricted and unrestricted promotions. • Pricing with combinable promotions. • Pricing based on current availability (near real-time). • Price points at the guest level and guest type with applied promotions. • Price breakdown (cruise fare, taxes and fees, etc.) and bundling based on market definition. • Pricing by market and currency.
Super Category Pricing	Super Category pricing service provides the pricing details for each of the available super category for a given sailing and package. Service provides the following: • Best Rate/Best Value at super category level (Inside, Oceanview, Balcony, Deluxe) and individual category level. • Pricing based on restricted and unrestricted promotions. • Pricing with combinable promotions. • Pricing based on current availability (near real-time). • Price points at the guest level and guest type with applied promotions.

	• Price breakdown (cruise fare, taxes and fees, etc.) and bundling based on market definition. • Pricing by market and currency.
Group Pricing	Group pricing service provides the pricing details of the groups which the agency is able to book into for a given sailing and package. Service provides the following: • Group allocated category Best Rate/Best Value at individual category level. • Pricing based on restricted and unrestricted promotions. • Pricing with combinable promotions. • Pricing based on current availability (near real-time). • Price points at the guest level and guest type with applied promotions. • Price breakdown (cruise fare, taxes and fees, etc.) and bundling based on market definition. • Pricing by market and currency. • Applies to active Traditional or HQ Promotional groups only.
Promotion Details	Promotion Details service returns details of all applicable promotions for the agency.
Price Change Identifications – Super Category	Price Change Identifications service returns keys for all sailings which have had any price changes at super category level, since a specified time, so that the agency can identify sailings that need to be reloaded with the latest price.
Price Change Identifications – Category	Price Change Identifications service returns keys for all sailings which have had any price changes at category level, since a specified time, so that the agency can identify sailings that need to be reloaded with the latest price.
Sailing Package Changes	Sailing Package Changes service returns keys for all sailings which have had changes, since a specified time, so that the agency can identify sailings that need to be reloaded with the latest sailing information.

1.7 Special Design Considerations

Include the 'Accept-Encoding' key with the value 'gzip' in the request, to enable response compression. This is required in cases where the response size may exceed the hard limit set in the gateway.

All schemas will include the full set of known enum values at the time of publication. However, clients should not enforce strict JSON Schema validation. Instead, they must be designed to tolerate unknown or additional fields and enum values to ensure forward compatibility and seamless integration of future updates.

The Super Category Pricing Service should be used instead of the Category Pricing Service if the agency's use case does not require pricing details at the Category level.

Please note: “Air_addon” and “Airwaves_package” for flight pricing is out of scope for VPS.

2 Sailing Package

This service provides a list of all sailings and packages available with relevant details. This service can also be invoked to get the details for a specific sailing and package.

2.1 Endpoint(s)

Test (points to “Current” Environment that matches Cruise API)

<https://tst1.api.rccl.com/vps/vps/catalog/v1/sailing-package>

Stage

<https://stg1.api.rccl.com/vps/vps/catalog/v1/sailing-package>

Prod

<https://api.rccl.com/vps/vps/catalog/v1/sailing-package>

2.2 API Keys

Will be provided upon request.

2.3 Yaml File/Schema

Run the following curl command to download the yaml file.

Note: Before you run, please update the command with the API Key provided.

```
curl --request GET \
  --url https://tst1.api.rccl.com/vps/partner/open-api/v3/api-docs/ \
  --header 'X-API-key: xxxxxx'
```

2.4 Functional Specifications

Based on the request criteria, the response contains details pertaining to each sailing and package. The service provides the following details:

- Sailing
- Package
- Itinerary

2.5 Non-functional Specifications

Recommended usage pattern:

- Call the SailingPackage and Pricing services for initial load.
- Call trickleUpdate services to retrieve the business keys that have updated since a specific dateTime (passed in as a parameter).
- For these businessKeys, invoke the SailingPackage service, Super Category Pricing service and Category Pricing service to update your cache.
- The frequency of calls to trickle update should be at least 60 mins apart.
- Call on a daily basis for a full refresh (same as initial load).

2.6 Schema Specification

Refer to [12.1 Sailing Package Request](#) and [12.2 Sailing Package Response](#) in Appendix A.

2.7 Error Handling

Please refer to [13.1 Error Handling](#) in Appendix B.

3 Super Category Pricing

Super Category-pricing service provides the pricing details for each of the available super category for a given sailing and package. Service provides the following:

- Best Rate/Best Value for an individual category at super category level (Inside, Oceanview, Balcony, Deluxe).
- Pricing based on restricted and unrestricted promotions.
- Pricing with combinable promotions.
- Pricing based on current availability (near real-time).
- Price points at the guest level and guest type with applied promotions.
- Price breakdown (cruise fare, taxes and fees, etc.) and bundling based on market definition.
- Pricing by market and currency.

3.1 Endpoint(s)

Test (points to “Current” Environment that matches Cruise API)

<https://tst1.api.rccl.com/vps/vps/partner-pricing/v1/super-category-pricing>

Stage

<https://stg1.api.rccl.com/vps/vps/partner-pricing/v1/super-category-pricing>

Prod

<https://api.rccl.com/vps/vps/partner-pricing/v1/super-category-pricing>

3.2 API Keys

Will be provided upon request.

3.3 Yaml File/Schema

Run the following curl command to download the yaml file.

Note: Before you run, please update the command with the API Key provided.

```
curl --request GET \  
  --url https://tst1.api.rccl.com/vps/partner/open-api/v3/api-docs/ \  
  --header 'X-API-key: xxxxxx'
```

3.4 Functional Specifications

Based on the request criteria, the response contains agency-specific pricing details by super category for a sailing.

- An agency's ID (ClientID) is needed to retrieve data.
- The brand, ship, sail date, and package are required to identify a sailing.
- A currency must be supplied and should be a valid one for the agency.
- Provided Company Short Name should be sent in request.

This endpoint provides the different groupings of all price points by super category for a given sailing package.

- promotionBestPrices
 - Returns price points for eligible and ineligible promotion(s) at the super category level.
 - Price Points with Eligible Promotions – contains 1 to n combinable promotion(s) that meets requested qualification criteria.
 - Price Points with Ineligible Promotions – contains only 1 promotion that needs additional qualification criteria.
 - There is a set of super category level pricing per promotion.

Promotion ID (Lead)	Combinable With	Eligible
P1	P2, P5	Yes
P2	P1, P5	Yes
P3	N/A	No
P4	N/A	Yes
P5	P1, P2	Yes

- superCategoryBestPrices
 - Returns the best price with eligible promotion(s), including combinability (if applicable), for each available super category:
 - I – Inside
 - O – Oceanview
 - B – Balcony
 - D – Deluxe
- superCategoryBasePriceRates
 - Returns the best base price, Standard and Brochure (if applicable), for each available super category. No promotions applied.

3.5 Non-functional Specifications

Recommended usage pattern:

- Call the SailingPackage and Pricing services for initial load.
- Call trickleUpdate services to retrieve the business keys that have updated since a specific dateTime (passed in as a parameter).
- For these businessKeys, invoke the Sailing Package service, Super Category Pricing service and Category Pricing service to update your cache.
- The frequency of calls to trickle update should be at least 60 mins apart.
- Call on a daily basis for a full refresh (same as initial load).

3.6 Schema Specification

Refer to [12.3 Super Category Pricing Request](#) and [12.4 Super Category Pricing Response](#) in Appendix A.

3.7 Error Handling

Please refer to [13.1 Error Handling](#) in Appendix B.

4 Category Pricing

Category-pricing service provides the pricing details for each of the available categories for a given sailing and package. Service provides the following:

- Best Rate/Best Value at an individual category level.
- Pricing based on restricted and unrestricted promotions.
- Pricing with combinable promotions.
- Pricing based on current availability (near real-time).
- Price points at the guest level and guest type with applied promotions.
- Price breakdown (cruise fare, taxes and fees, etc.) and bundling based on market definition.
- Pricing by market and currency.

4.1 Endpoint(s)

Test (points to “Current” Environment that matches Cruise API)

<https://tst1.api.rccl.com/vps/vps/partner-pricing/v1/category-pricing>

Stage

<https://stg1.api.rccl.com/vps/vps/partner-pricing/v1/category-pricing>

Prod

<https://api.rccl.com/vps/vps/partner-pricing/v1/category-pricing>

4.2 API Keys

Will be provided upon request.

4.3 Yaml File/Schema

Run the following curl command to download the yaml file.

Note: Before you run please update the command with the API Key provided

```
curl --request GET \  
  --url https://tst1.api.rccl.com/vps/partner/open-api/v3/api-docs/ \  
  --header 'X-API-key: xxxxxx'
```

4.4 Functional Specifications

Based on the request criteria, the response contains agency-specific pricing details by category for a sailing.

- An agency's ID (ClientID) is needed to retrieve data.
- The brand, ship, sail date, and package are required to identify a sailing.
- A currency must be supplied and should be a valid one for the agency.
- Provided Company Short Name should be sent in request.

This endpoint provides the different groupings of all price points by category for a given sailing package.

- promotionBestPrices
 - Returns price points for eligible and ineligible promotion(s) at the category level.
 - Price Points with Eligible Promotions – contains 1 to n combinable promotion(s) that meets requested qualification criteria.
 - Price Points with Ineligible Promotions – contains only 1 promotion that requires additional qualification criteria.
 - There is a set of category level pricing per promotion.

Promotion ID (Lead)	Combinable With	Eligible
P1	P2, P5	Yes
P2	P1, P5	Yes
P3	N/A	No
P4	N/A	Yes
P5	P1, P2	Yes

- categoryBestPrices
 - Returns the best price with eligible promotion(s), including combinability (if applicable), for each available category.
- categoryBasePriceRates
 - Returns the best base price (Standard and Brochure) for each available category. No promotions applied.

4.5 Non-Functional Specifications

Recommended usage pattern:

- Call the SailingPackage and Pricing services for initial load.
- Call trickleUpdate services to retrieve the business keys that have updated since a specific dateTime (passed in as a parameter).
- For these businessKeys, invoke the SailingPackage service, Super Category Pricing service and Category Pricing service to update your cache.

- The frequency of calls to trickle update should be at least 60 mins apart.
- Call on a daily basis for a full refresh (same as initial load).

4.6 Schema Specification

Refer to [12.5 Category Pricing Request](#) and [12.6 Category Pricing Response](#) in Appendix A.

4.7 Error Handling

Please refer to [13.1 Error Handling](#) in Appendix B.

5 Group Pricing

(Applicable only to agencies who are registered for Groups)

Group-pricing service provides the pricing details of the groups for which the agency can book into for a given sailing and package. Service provides the following:

- Group allocated category Best Rate/Best Value at individual category level.
- Pricing based on restricted and unrestricted promotions.
- Pricing with combinable promotions.
- Pricing based on current availability (near real-time).
- Price points at the guest level and guest type with applied promotions.
- Price breakdown (cruise fare, taxes and fees, etc.) and bundling based on market definition.
- Pricing by market and currency.
- Applies to active Traditional or HQ Promotional groups only.

5.1 Endpoint(s)

Test (points to “Current” Environment that matches Cruise API)

<https://tst1.api.rccl.com/vps/vps/partner-pricing/v1/group-pricing>

Stage

<https://stg1.api.rccl.com/vps/vps/partner-pricing/v1/group-pricing>

Prod

<https://api.rccl.com/vps/vps/partner-pricing/v1/group-pricing>

5.2 API Keys

Will be provided upon request.

5.3 Yaml File/Schema

Run the following curl command to download the yaml file.

Note: Before you run, please update the command with the API Key provided.

```
curl --request GET \  
  --url https://tst1.api.rccl.com/vps/partner/open-api/v3/api-docs/ \  
  --header 'X-API-key: xxxxxx'
```

5.4 Functional Specifications

Based on the request criteria, the response contains pricing details of each group they are authorized to book into, by category for a sailing.

- An agency's ID (ClientID) is needed to retrieve data.
- The brand, ship, sail date, and package are required to identify a sailing.
- A currency must be supplied and should be a valid one for the agency.

For each category allocated to the group, the service provides best prices and base prices with an average guest price point and individual guest level.

- allocatedCategoryBestPrices
 - Returns best price, including eligible promotions, for each category allocated to the group.
- allocatedCategoryBasePrices
 - Returns best base price for each category allocated to the group. No promotions applied.

5.5 Non-functional Specifications:

Recommended usage pattern:

- Call on a scheduled job basis.
 - All Sailings - hourly or once per day for a full refresh.

5.6 Schema Specification

Refer to [12.7 Group Pricing Request](#) and [12.8 Group Pricing Response](#) in Appendix A.

5.7 Error Handling

Please refer to [13.1 Error Handling](#) in Appendix B.

6 Promotion Details

Promotion Details service returns details of all applicable promotions for the agency.

6.1 Endpoint(s)

Test (points to “Current” Environment that matches Cruise API)

<https://tst1.api.rccl.com/vps/vps/promotion/v1/promotion-details>

Stage

<https://stg1.api.rccl.com/vps/vps/promotion/v1/promotion-details>

Prod

<https://api.rccl.com/vps/vps/promotion/v1/promotion-details>

6.2 API Keys

Will be provided upon request.

6.3 Yaml File/Schema

Run the following curl command to download the yaml file.

Note: Before you run, please update the command with the API Key provided.

```
curl --request GET \  
  --url https://tst1.api.rccl.com/vps/partner/open-api/v3/api-docs/ \  
  --header 'X-API-key: xxxxxx'
```

6.4 Functional Specifications

Based on the request criteria by either client or market, the response contains details of all promotions which the agency is eligible for.

- If requesting with client information, an agency’s ID (ClientID) is required to retrieve promotion data by client, with currency, office and country optional.
- If Client is not passed, an agency’s officeCode, countryCode, and currencyCodes are required to retrieve promotion data by market.

6.5 Non-functional Specifications

Recommended usage pattern:

- Call the service once a day for a complete refresh of the details for all promotions.

6.6 Schema Specification

Refer to [12.9 Promotion Details Request](#) and [12.10 Promotion Details Response](#) in Appendix A.

6.7 Error Handling

Please refer to [13.1 Error Handling](#) in Appendix B.

7 Price Change Identifications – Super Category

Price Change Identifications service returns keys for all sailings which have had any price changes at super category level, since a specified time, so that the agency can identify sailings that need to be reloaded with the latest price.

7.1 Endpoint(s)

Test (points to “Current” Environment that matches Cruise API)

<https://tst1.api.rccl.com/vps/vps/pricing-snapshot/v1/price-changes:super-category>

Stage

Prod

<https://api.rccl.com/vps/vps/pricing-snapshot/v1/price-changes:super-category>

7.2 API Keys

Will be provided upon request.

7.3 Yaml File/Schema

Run the following curl command to download the yaml file.

Note: Before you run, please update the command with the API Key provided.

```
curl --request GET \  
  --url https://tst1.api.rccl.com/vps/partner/open-api/v3/api-docs/ \  
  --header 'X-API-key: xxxxxx'
```

7.4 Functional Specifications

Based on the request criteria by either client or market, the response contains all sailings which have had any price changes at super category level.

- If requesting with client information, an agency’s ID (ClientID) is required to retrieve promotion data by client, with currency, office and country optional.
- If client is not passed, an agency’s officeCode, countryCode, and currencyCodes are required to retrieve promotion data by market.

7.5 Non-functional Specifications

Recommended usage pattern:

- Call the SailingPackage and Pricing services for initial load.
- Call trickleUpdate services to retrieve the business keys that have updated since a specific dateTime (passed in as a parameter).
- For these businessKeys, invoke the SailingPackage service, Super Category Pricing service and Category Pricing service to update your cache.
- The frequency of calls to trickle update should be at least 60 mins apart.
- Call once a day for a full refresh (same as initial load).

7.6 Schema Specification

Refer to [12.11 Price Change Identifications – Super Category Request](#) and [12.12 Price Change Identifications – Super Category Response](#) in Appendix A.

7.7 Error Handling

Please refer to [13.1 Error Handling](#) in Appendix B.

8 Price Change Identifications – Category

Price Change Identifications service returns keys for all sailings which have had any price changes at category level, since a specified time, so that the agency can identify sailings that need to be reloaded with the latest price.

8.1 Endpoint(s)

Test (points to “Current” Environment that matches Cruise API)

<https://tst1.api.rccl.com/vps/vps/pricing-snapshot/v1/price-changes:category>

Stage

<https://stg1.api.rccl.com/vps/vps/pricing-snapshot/v1/price-changes:category>

Prod

<https://api.rccl.com/vps/vps/pricing-snapshot/v1/price-changes:category>

8.2 API Keys

Will be provided upon request.

8.3 Yaml File/Schema

Run the following curl command to download the yaml file.

Note: Before you run, please update the command with the API Key provided.

```
curl --request GET \  
  --url https://tst1.api.rccl.com/vps/partner/open-api/v3/api-docs/ \  
  --header 'X-API-key: xxxxxx'
```

8.4 Functional Specifications

Based on the request criteria by either client or market, the response contains all sailings which have had any price changes at category level.

- If requesting with client information, an agency's ID (ClientID) is required to retrieve promotion data by client, with currency, office and country optional.
- If client is not passed, an agency's officeCode, countryCode, and currencyCodes are required to retrieve promotion data by market.

8.5 Non-functional Specifications

Recommended usage pattern:

- Call the SailingPackage and Pricing services for initial load.
- Call trickleUpdate services to retrieve the business keys that have updated since a specific dateTime (passed in as a parameter).
- For these businessKeys, invoke the SailingPackage service, Super Category Pricing service and Category Pricing service to update your cache.
- The frequency of calls to trickle update should be at least 60 mins apart.
- Call once a day for a full refresh (same as initial load).

8.6 Schema Specification

Refer to [12.13 Price Change Identifications – Category Request](#) and [12.14 Price Change Identifications – Category Response](#) in Appendix A.

8.7 Error Handling

Please refer to [13.1 Error Handling](#) in Appendix B.

9 Sailing Package Changes

Sailing Package Changes service returns keys for all sailings which have had changes, since a specified time, so that the agency can identify sailings that need to be reloaded with the latest sailing information.

9.1 Endpoint(s)

Test (points to “Current” Environment that matches Cruise API)

<https://tst1.api.rccl.com/vps/vps/catalog/v1/sailing-package-changes>

Stage

<https://stg1.api.rccl.com/vps/vps/catalog/v1/sailing-package-changes>

Prod

<https://api.rccl.com/vps/vps/catalog/v1/sailing-package-changes>

9.2 API Keys

Will be provided upon request.

9.3 Yaml File/Schema

Run the following curl command to download the yaml file.

Note: Before you run, please update the command with the API Key provided.

```
curl --request GET \  
  --url https://tst1.api.rccl.com/vps/partner/open-api/v3/api-docs/ \  
  --header 'X-API-key: xxxxxx'
```

9.4 Functional Specifications

Based on the request criteria, the response returns sailings which have had sailing details change(s) since a specified time.

9.5 Non-functional Specifications

Recommended usage pattern:

- Call the SailingPackage for initial load.
- Call trickleUpdate services to retrieve the business keys that have updated since a specific dateTime (passed in as a parameter).
- For these businessKeys, invoke the SailingPackage service to update your cache/datastore.
- The frequency of calls to trickle update should be at least 60 mins apart.
- Call once a day for a full refresh (same as initial load).

9.6 Schema Specification

Refer to [12.15 Sailing Package Changes Request](#) and [12.16 Sailing Package Changes Response](#) in Appendix A.

9.7 Error Handling

Please refer to [13.1 Error Handling](#) in Appendix B.

10 Support

Partners should communicate via Jira email address vps-partner-support@rccl.com, for any support needs. Partners will receive an acknowledgement with Jira ticket number and will be able to check the status on their request.

11 Glossary

Term	Definition
VPS	Vacation Pricing & Search
Partner	External Agency (i.e., Expedia, Sabre)
Restricted Promotion	Promotions that are based on guest profile (Loyalty, Senior, etc.)
Unrestricted Promotion	Promotions that do not involve guest profile (Sailing level promotion, Promo code, etc.)
Market	Office/Country/Currency combination
FIT	Individual Booking / a booking that is not part of a group reservation.
Group Shell	A Group Master ID that links together multiple Individual Reservations.
Group Booking	Individual booking within a group shell.
NRP	Non-Refundable Promotion
I, O, B, D, A, C	Super Categories – Inside, Outside, Balcony, Deluxe; Aqua and Concierge – Only for Celebrity Brand
Best Rate	Price point with the lowest/best Net Total, based on the eligibility of promotions (combinability rules apply) that give a discount % or an amount off.
Best Value	Price point with the lowest/best (Net Total - Value Add) Tools, this is the rate that gives the greatest discount available to a guest based on the eligibility of promotions (combinability rules apply) that give a discount % or an amount off and inclusive of any value add elements that are part of the eligible promotion or are combinable with the promotion.
CruiseTour	A CruiseTour (or cruise tour) is a combination land/sea vacation that includes both a cruise and a land-based vacation as part of a package.
Sailing	Ship/Sail Date/Package combination
Prevailing Rate	Current best rate which includes applicable promotion discounts.
Standard Base Rate	Standard base price with no promotions/discounts applied
Brochure Base Rate	Brochure base price with no promotions/discounts applied

12 Appendix A

12.1 Sailing Package Request

Parameter	Parameter Type	Description	Required	Example Value
brandCode	Body attribute	Code used to represent the brand of the ship.	Yes	"R" – Royal or "C" – Celebrity
shipCodes	Body attribute	Two-character code for the desired ship	No	"BR"
fromSailDate	Body attribute	The starting sail date in a range of desired sailings. Sail date (not the package start date in case of an inclusive pre tour in the package)	No Default: Current Date	"2022-06-05"
toSailDate	Body attribute	The ending sail date in a range of desired sailings. Sail date (not the package end date in case of an inclusive post tour in the package)	No	"2022-06-05"
includeTourPackages	Body attribute	Flag to include cruise tour packages	No Default Value: False	true or false

12.2 Sailing Package Response

	Field	Description	Example Value
1	status.httpStatus	The http response status	"OK"
2	status.dateTime	Date and time response was sent	"2022-09-07T14:10:42.726098"
3	status.details.code	Number identifier for detail	1005
4	status.details.codeDescription	Description of the code	"PARTIAL_CONTENT_SUCCESS"
5	status.details.detailType	Type of detail	"SERVER_ERROR"
6	status.details.message	Message describing the specific detail information	"resourceType: SAILING, message: not found"
7	sailingPackages.brandCode	Brand of the ship	"R" – Royal

8	sailingPackages.cruiseOnly	Flag that indicates if sailing package is a cruise only or cruise tour package	true false
9	sailingPackages.duration	Duration of the sailing package	11
10	sailingPackages.shipCode	Two-character code for the ship	"RD"
11	sailingPackages.sailDate	The date of the sailing in the format of YYYY-MM-DD	"2023-08-18"
12	sailingPackages.sailingStatus	Status of the sailing	"ACTIVE"
13	sailingPackages.packageCode	Sailing package code	"RD11BJ04"
14	sailingPackages.shipName	Name of the ship	"RADIANCE OF THE SEAS"
15	sailingPackages.packageDescription	Package description	"11nt WILDERNESS FRONTIER EXPLORER CT 4B"
16	sailingPackages.regionCode	Region code of the package	"ALCAN"
17	sailingPackages.subRegionCode	Sub-region code of the package	"AK"
18	sailingPackages.sailingItinerary.itineraryCode	Itinerary code of the package	"07A313"
19	sailingPackages.sailingItinerary.duration	Duration of the itinerary	7
20	sailingPackages.sailingItinerary.schedule.dayNumber	Day number of the itinerary	1
21	sailingPackages.sailingItinerary.schedule.date	Date of the day from the itinerary	"2023-08-18"
22	sailingPackages.sailingItinerary.schedule.portCode	Port code for the day from the itinerary	"SWD"
23	sailingPackages.sailingItinerary.schedule.portName	Port name for the day from the itinerary	"SEWARD, ALASKA"
24	sailingPackages.sailingItinerary.schedule.countryName	Port country for the day from the itinerary	"UNITED STATES"
25	sailingPackages.sailingItinerary.schedule.activity	Indicates if the ship is sailing, docked, tendered for the day from the itinerary	"EMBARK" "DEBARK" "DOCKED" "CRUISING"

			"TENDERED"
26	sailingPackages.sailingItinerary.schedule.arrivalTime	Arrival time for the day from the itinerary	"15:00:00"
27	sailingPackages.sailingItinerary.schedule.departureTime	Departure time for the day from the itinerary	"18:00:00"
28	sailingPackages.sailingItinerary.itineraryType	Code used to represent the itinerary type for the sailing itinerary	"C" – Culturally Enriching "V" – River Cruise
29	sailingPackages.sailingItinerary.voyageType	Code used to represent the voyage based on the type of waterway	"O" – Ocean Cruise "V" – River Cruise
30	sailingPackages.tours.tourCode	Code of the pre or post tour	"A3R04B"
31	sailingPackages.tours.tourTypeCode	Type code of the pre or post tour	"PRE"
32	sailingPackages.tours.duration	Length of the pre or post tour	5
33	sailingPackages.tours.schedule.dayNumber	Day number of the tour	1
34	sailingPackages.tours.schedule.sequenceWithinDayNumber	The sequence order number for each tour activity within the day	1
35	sailingPackages.tours.schedule.date	Date of the tour	"2023-08-14"
36	sailingPackages.tours.schedule.startCityCode	Code representing the city where tour starts	"FAI"
37	sailingPackages.tours.schedule.startCityName	Name of the city where tour starts	"FAIRBANKS, ALASKA"
38	sailingPackages.tours.schedule.endCityCode	Code representing the city where tour ends	"FAI"
39	sailingPackages.tours.schedule.endCityName	Name of the city where tour ends	"FAIRBANKS, ALASKA"
40	sailingPackages.tours.schedule.componentDescription	Description of the tour component	"PRE CRUISETOUR 4B"
41	sailingPackages.tours.schedule.componentShortDescription	Short description of the tour component	"PRE CRUISETOUR 4B"

42	sailingPackages.tours.schedule.componentTypeCode	Type code of the tour component	"PT4B"
43	sailingPackages.tours.schedule.componentProviderCode	Provider code of the tour component	"CIRIC"
44	sailingPackages.tours.schedule.componentTypeDescription	Description of the tour type	"ATTRACTION"
45	sailingPackages.tours.schedule.componentProviderName	Provider name of the tour component	"CIRI ALASKAN TOURISM CORPORATION"

12.3 Super Category Pricing Request

Parameter	Parameter Type	Description	Required	Example Value
clients	Array	Contains client objects	Yes	N/A
clients.clientContext	Body attribute	Code used to represent the actual agency who will be making the booking	Yes	"AGENCY_1"
clients.clientID	Body attribute	Code used to represent the ID of the agency	Yes	1000
bookingChannel	Body attribute	Code used to represent the booking channel of the agency	No	"PI"
companyShortName	Body attribute	Code used to represent the agency name	Yes	"Your agency name"
brandCode	Body attribute	Code used to represent the brand of the ship	Yes	"R" – Royal "C" – Celebrity
shipCode	Body attribute	Two-character code for the desired ship	Yes	"BR"
sailDate	Body attribute	The date of the desired sailing. Sail date (not the package start date in case of an inclusive pre tour in the package) in the format of YYYYMMDD	Yes	"2022-06-05"
packageCode	Body attribute	Sailing package code.	Yes	"BR07M532"
officeCode	Body attribute	Code used to represent the office to which the partner agency is affiliated with	No	"MIA"
countryCode	Body attribute	Code used to represent the country of the booking	No	"USA"

currencyCode	Body attribute	Code used to represent the currency in which the booking will be made.	Yes	"USD"
occupancy	Body attribute	Represents the occupancy of the booking. Note: - If occupancy is passed without guestPreference(s), adult life stage defaults for that occupancy. - If both occupancy and guestPreference(s) are passed - response will match occupancy if the number of guestPreference(s) = occupancy. - response will match guestPreference(s) if the number of guestPreference(s) ≠ occupancy. - If occupancy and guestPreference(s) are both not passed, response defaults to 2 adults.	No	1 2 3 4
bookingTypeCode	Body attribute	Code used to represent the type of booking	Yes	"I" – Individual (FIT) "G" – Group
categoryCode	Body attribute	Code used to represent the category of the booking	No	"A3"
pricingPreference	Object	Contains pricingPreference attributes. Can be an empty object	Yes	N/A
pricingPreference.accessibleStateRoomsOnly	Body attribute	Filters the categories with accessible staterooms only	No	true or false

pricingPreference.includeSoldOut	Body attribute	Filters the categories to include sold out	No	true or false
pricingPreference.depositFareType	Body attribute	Filters the categories based on the refundable fare preference	No	Default – BOTH "REF" – Refundable Fare Type "NON_REF" – Non Refundable Fare Type
pricingPreference.promoCodes	Body attribute	Represents the promotion code the guest in the booking is looking for	No	"SAVE30"
pricingPreference.includeGuestLevelDetail	Body attribute	Filters the display of guest details	No	true or false
pricingPreference.includeGratuity	Body attribute	Filters the display of gratuity amount information	No	true or false
guestPreferences	Array	Contains guestPreference objects	No	N/A
guestPreferences.lifeStageCode	Body attribute	Represents the life stage of the guest in the booking	No	"A" – Adult "C" – Child "I" – Infant "S" – Senior
guestPreferences.age	Body attribute	Represents the age of the guest in the booking	No	45
guestPreferences.loyaltyTierCode	Body attribute	Represents the loyalty tier of the guest in the booking	No	"G" – Gold "D" – Diamond
guestPreferences.residenceStateProvinceCode	Body attribute	Represents the residential state/province of the guest in the booking	No	"FL"
guestPreferences.publicServiceCode	Body attribute	Code which represents the occupation of the guest in the booking	No	"M" – Military "P" – Police "F" – Firefighter "C" – Civil Service "V" – Collectivos

guestPreferences.gateway	Body attribute	Represents the gateway of the guest in the booking	No	"FLL"
guestPreferences.loyaltyID	Body attribute	Represents the loyalty number of the guest in the booking	No	"738772348"

12.4 Super Category Pricing Response

	Field	Description	Example Value
1	status.httpStatus	The http response status	"OK"
2	status.dateTime	Date and time response was sent	"2022-09-07T14:10:42.726098"
3	status.details.code	Number identifier for detail	1005
4	status.details.codeDescription	Description of the code	"PARTIAL_CONTENT_SUCCCESS" "DECODING_ERROR" "FIELD_VIOLATION" "EMPTY_REQUEST" "AUTHORIZATION_ERROR" "RESOURCE_NOT_FOUND" "INDEX_NOT_FOUND" "CLIENT_CALL_ERROR" "GENERIC_ERROR" "EXTRA_DETAIL" "THROTTLED_REQUEST"
5	status.details.detailType	Type of detail	"SERVER_ERROR" "CLIENT_ERROR" "WARNING" "INFO"
6	status.details.message	Message describing the specific detail information	"resourceType: SAILING, message: not found"
7	promotionBestPrices.leadPromotion.promotionId	Identifier for a promotion	"F1112342"

8	promotionBestPrices.leadPromotion.shortDescription	Short description of a promotion	"KIDSSAILFREE"
9	promotionBestPrices.eligible	Flag that indicates if current price point may be booked with the current criteria	true false
10	promotionBestPrices.combinableWith.promotionId	Identifier for a promotion	"F1112342"
11	promotionBestPrices.combinableWith.shortDescription	Short description of a promotion	"KIDSSAILFREE"
12	promotionBestPrices.superCategoryBestPrices.superCategoryCode	Code of the Super Category or Cabin Class of the Category priced	"I" – Inside "O" – Outside "B" – Balcony "D" – Deluxe "A" – Aqua "C" – Concierge
13	promotionBestPrices.superCategoryBestPrices.superCategoryName	Super category name for the category	"INSIDE" "OUTSIDE" "BALCONY" "DELUXE" "AQUA" "CONCIERGE"
14	promotionBestPrices.superCategoryBestPrices.bestRate.stateroomCategoryCode	Stateroom category for which the best rate is applicable	"S1"
15	promotionBestPrices.superCategoryBestPrices.bestRate.guaranteeCategoryFlag	Flag that indicates if the category contains only GTY spaces	true - if the category contains only GTY space false - if the category contains physical staterooms
16	promotionBestPrices.superCategoryBestPrices.bestRate.stateroomSuperCategory	super category (cabin class) code for the category	"I" – Inside "O" – Outside "B" – Balcony "D" – Deluxe

			"A" – Aqua "C" – Concierge
17	promotionBestPrices.superCategoryBestPrices.bestRate.stateroomTypeCode	Code representing the type of the stateroom	"SI" – Standard Inside "LO" – Large Outside "DO" – Deluxe Outside
18	promotionBestPrices.superCategoryBestPrices.bestRate.restrictedPromotionApplied	Flag that indicates if a restricted promotion is applied	true false
19	promotionBestPrices.superCategoryBestPrices.bestRate.accessibleStateroomExistFlag	Flag that indicates if there is a minimum of 1 accessible stateroom available	true - when there is a minimum of 1 accessible stateroom available false - when there is no accessible stateroom available
20	promotionBestPrices.superCategoryBestPrices.bestRate.refundableFareFlag	Flag that indicates if all promotions are refundable.	true - when all the promotions are refundable type false - when minimum of 1 promotion that is non-refundable
21	promotionBestPrices.superCategoryBestPrices.bestRate.appliedBasePriceId	Identifier of applied base price	"I3895352"
22	promotionBestPrices.superCategoryBestPrices.bestRate.basePriceShortDescription	Description of applied base price	"STANDARD"
23	promotionBestPrices.superCategoryBestPrices.bestRate.basePriceType	Type of applied base price	"S"
24	promotionBestPrices.superCategoryBestPrices.bestRate.appliedPromotionIds	List of promotions applied	["G0738129", "J1426691"]
25	promotionBestPrices.superCategoryBestPrices.bestRate.promoCodeApplied	Flag indicates if the applied promo code is of type 'T' (targeted offer)	true - if applied promo code type = "T" (Targeted Offer) false - if applied promo code type = "O" (Non-Targeted Offer)
26	promotionBestPrices.superCategoryBestPrices.bestRate.leadPromotion.promotionId	Identifier of the lead promotion	"G0738129"
27	promotionBestPrices.superCategoryBestPrices.bestRate.leadPromotion.shortDescription	Description of the lead promotion	"BOGO60 NRD"
28	promotionBestPrices.superCategoryBestPrices.bestRate.averagePerGuestPricePoint.guestSequenceId	Guest sequence number, starting from 1 up to the	1 2

		total occupancy requested	3 4
29	promotionBestPrices.superCategoryBestPrices.bestRate.averagePerGuestPricePoint.appliedLifeStage	Indicates the life stage of the guest	"A" – Adult "C" – Child "I" – Infant "S" – Senior
30	promotionBestPrices.superCategoryBestPrices.bestRate.averagePerGuestPricePoint.netTotal	Average net total amount per guest	1200.00
31	promotionBestPrices.superCategoryBestPrices.bestRate.averagePerGuestPricePoint.includedInNetTotal	Components that are included in the Total Amount	"CFARE" "NCCF" "TAXF" "PPGR"
32	promotionBestPrices.superCategoryBestPrices.bestRate.averagePerGuestPricePoint.netCruiseFareAmount	Guest level - net package Cruise Fare after applying the promotion discounts	4279.00
33	promotionBestPrices.superCategoryBestPrices.bestRate.averagePerGuestPricePoint.nonComissionalCruiseFareAmount	Guest level - Non commissionable cruise fare amount applicable to the corresponding guest in the booking after applying the promotion discounts	170.00
34	promotionBestPrices.superCategoryBestPrices.bestRate.averagePerGuestPricePoint.taxesAndFeesAmount	Guest level - Taxes and Fees charges	140.76
35	promotionBestPrices.superCategoryBestPrices.bestRate.averagePerGuestPricePoint.gratuityAmount	Guest level - Gratuity charges	39.90

12.5 Category Pricing Request

Parameter	Parameter Type	Description	Required	Example Value
clients	Array	Contains client objects	Yes	N/A
clients.clientContext	Body attribute	Code used to represent the actual agency who will be making the booking	Yes	"AGENCY_1"
clients.clientID	Body attribute	Code used to represent the ID of the agency	Yes	1000
bookingChannel	Body attribute	Code used to represent the booking channel of the agency	No	"PI"
companyShortName	Body attribute	Code used to represent the agency name	Yes	"Your agency name"
brandCode	Body attribute	Code used to represent the brand of the ship	Yes	"R" – Royal "C" – Celebrity
shipCode	Body attribute	Two-character code for the desired ship	Yes	"BR"
sailDate	Body attribute	The date of the desired sailing. Sail date (not the package start date in case of an inclusive pre tour in the package) in the format of YYYYMMDD	Yes	"2022-06-05"
packageCode	Body attribute	Sailing package code.	Yes	"BR07M532"
officeCode	Body attribute	Code used to represent the office to which the partner agency is affiliated with	No	"MIA"
countryCode	Body attribute	Code used to represent the country of the booking	No	"USA"
currencyCode	Body attribute	Code used to represent the currency in which the booking will be made.	Yes	"USD"
occupancy	Body attribute	Represents the occupancy of the booking Note: If occupancy is passed without	No	1 2 3 4

		guestPreference(s), adult life stage defaults for that occupancy. - If both occupancy and guestPreference(s) are passed - response will match occupancy if the number of guestPreference(s) = occupancy. - response will match guestPreference(s) if the number of guestPreference(s) ≠ occupancy. - If occupancy and guestPreference(s) are both not passed, response defaults to 2 adults.		
bookingTypeCode	Body attribute	Code used to represent the type of booking	Yes	"I" – Individual (FIT) "G" – Group
categoryCode	Body attribute	Code used to represent the category of the booking	No	"A3"
pricingPreference	Object	Contains pricingPreference attributes. Can be an empty object	Yes	N/A
pricingPreference.accessibleStateRoomsOnly	Body attribute	Filters the categories with accessible staterooms only	No	true or false
pricingPreference.includeSoldOut	Body attribute	Filters the categories to include sold out	No	true or false
pricingPreference.depositFareType	Body attribute	Filters the categories based on the refundable fare preference	No	Default – BOTH "REF" – Refundable Fare Type "NON_REF" – Non Refundable Fare Type

pricingPreference.promoCodes	Body attribute	Represents the promotion code the guest in the booking is looking for	No	"SAVE30"
pricingPreference.includeGuestLevelDetail	Body attribute	Filters the display of guest details	No	true or false
pricingPreference.includeGratuity	Body attribute	Filters the display of gratuity amount information	No	true or false
guestPreferences	Array	Contains guestPreference objects	No	N/A
guestPreferences.lifeStageCode	Body attribute	Represents the life stage of the guest in the booking	No	"A" – Adult "C" – Child "I" – Infant "S" – Senior
guestPreferences.age	Body attribute	Represents the age of the guest in the booking	No	45
guestPreferences.loyaltyTierCode	Body attribute	Represents the loyalty tier of the guest in the booking	No	"G" – Gold "D" – Diamond
guestPreferences.residenceStateProvinceCode	Body attribute	Represents the residential state/province of the guest in the booking	No	"FL"
guestPreferences.publicServiceCode	Body attribute	Code which represents the occupation of the guest in the booking	No	"M" – Military "P" – Police "F" – Firefighter "C" – Civil Service "V" – Collectivos
guestPreference.gateway	Body attribute	Represents the gateway of the guest in the booking	No	"FLL"
guestPreference.loyaltyID	Body attribute	Represents the loyalty number of the guest in the booking	No	"738772348"

12.6 Category Pricing Response

	Field	Description	Example Value
1	status.httpStatus	The http response status	"OK"
2	status.dateTime	Date and time response was sent	"2022-09-07T14:10:42.726098"
3	status.details.code	Number identifier for detail	1005
4	status.details.codeDescription	Description of the code	"PARTIAL_CONTENT_SUCCCESS" "DECODING_ERROR" "FIELD_VIOLATION" "EMPTY_REQUEST" "AUTHORIZATION_ERROR" "RESOURCE_NOT_FOUND" "INDEX_NOT_FOUND" "CLIENT_CALL_ERROR" "GENERIC_ERROR" "EXTRA_DETAIL" "THROTTLED_REQUEST"
5	status.details.detailType	Type of detail	"SERVER_ERROR" "CLIENT_ERROR" "WARNING" "INFO"
6	status.details.message	Message describing the specific detail information	"resourceType: SAILING, message: not found"
7	promotionBestPrices.leadPromotion.promotionId	Identifier for a promotion	"F1112342"
8	promotionBestPrices.leadPromotion.shortDescription	Short description of a promotion	"KIDSSAILFREE"
9	promotionBestPrices.eligible	Flag that indicates if current price point may be booked with the current criteria	true false

10	promotionBestPrices.combinableWith.promotionId	Identifier for a promotion	"F1112342"
11	promotionBestPrices.combinableWith.shortDescription	Short description of a promotion	"KIDSSAILFREE"
12	promotionBestPrices.categoryBestPrices.stateroomCategoryCode	Two-character code for category priced	"S1"

252	brochureBestRate.guestPricePoints.valueAdds.amount	Guest level - OBC (Value add) currency	300.00

253	brochureBestRate.guestPricePoints.valueAdds.type	Guest level - Value add OBC amount	"OBC"
254	brochureBestRate.guestPricePoints.originalAmount	Guest level - Type of the value add	1706.60
255	metaInfo.bookingChannel	Booking channel used for pricing	"PI"
256	metaInfo.effectiveDateTime	Effective date and time of pricing	"20230407191219"

12.7 Group Pricing Request

Parameter	Parameter Type	Description	Required	Example Value
clients	Array	Contains client objects	Yes	N/A
clients.clientContext	Body attribute	Code used to represent the actual agency who will be making the booking	Yes	"AGENCY_1"
clients.clientID	Body attribute	Code used to represent the ID of the agency	Yes	1000
companyShortName	Body attribute	Code used to represent the agency name	Yes	"Your agency name"
brandCode	Body attribute	Code used to represent the brand of the ship	Yes	"R" – Royal "C" – Celebrity
shipCode	Body attribute	Two character code for the desired ship	Yes	"BR"
sailDate	Body attribute	The date of the desired sailing. Sail date (not the package start date in case of an inclusive pre tour in the package) in the format of YYYYMMDD	Yes	"2022-06-05"
packageCode	Body attribute	Sailing package code.	Yes	"BR07M532"
officeCode	Body attribute	Code used to represent the office to which the partner agency is affiliated with	No	"MIA"
countryCode	Body attribute	Code used to represent the country of the booking	No	"USA"

currencyCode	Body attribute	Code used to represent the currency in which the booking will be made.	Yes	"USD"
occupancy	Body attribute	Represents the occupancy of the booking Note: - If occupancy is passed without guestPreference(s), adult life stage defaults for that occupancy. - If both occupancy and guestPreference(s) are passed - response will match occupancy if the number of guestPreference(s) = occupancy. - response will match guestPreference(s) if the number of guestPreference(s) ≠ occupancy. - If occupancy and guestPreference(s) are both not passed, response defaults to 2 adults.	No	1 2 3 4
bookingTypeCode	Body attribute	Code used to represent the type of booking	Yes	"I" – Individual (FIT) "G" – Group
categoryCode	Body attribute	Code used to represent the category of the booking	No	"A3"
pricingPreference	Object	Contains pricingPreference attributes. Can be an empty object	Yes	N/A
pricingPreference.accessibleStateRoomsOnly	Body attribute	Filters the categories with accessible staterooms only	No	true or false

pricingPreference.includeSoldOut	Body attribute	Filters the categories to include sold out	No	true or false
pricingPreference.depositFareType	Body attribute	Filters the categories based on the refundable fare preference	No	Default – BOTH "REF" – Refundable Fare Type "NON_REF" – Non Refundable Fare Type
pricingPreference.promoCodes	Body attribute	Represents the promotion code the guest in the booking is looking for	No	"SAVE30"
pricingPreference.includeGuestLevelDetail	Body attribute	Filters the display of guest details	No	true or false
pricingPreference.includeGratuity	Body attribute	Filters the display of gratuity amount information	No	true or false
guestPreferences	Array	Contains guestPreference objects	No	N/A
guestPreferences.lifeStageCode	Body attribute	Represents the life stage of the guest in the booking	No	"A" – Adult "C" – Child "I" – Infant "S" – Senior
guestPreferences.age	Body attribute	Represents the age of the guest in the booking	No	45
guestPreferences.loyaltyTierCode	Body attribute	Represents the loyalty tier of the guest in the booking	No	"G" – Gold "D" – Diamond
guestPreferences.residenceStateProvinceCode	Body attribute	Represents the residential state/province of the guest in the booking	No	"FL"
guestPreferences.publicServiceCode	Body attribute	Code which represents the occupation of the guest in the booking	No	"M" – Military "P" – Police "F" – Firefighter "C" – Civil Service

				"V" – Collectivos
guestPreference.gateway	Body attribute	Represents the loyalty number of the guest in the booking	No	"FLL"
guestPreference.loyaltyID	Body attribute	Represents the loyalty number of the guest in the booking	No	"738772348"

12.8 Group Pricing Response

	Field	Description	Example Value
1	status.httpStatus	The http response status	"OK"
2	status.dateTime	Date and time response was sent	"2022-09-07T14:10:42.726098"
3	status.details.code	Number identifier for detail	1005
4	status.details.codeDescription	Description of the code	"PARTIAL_CONTENT_SUCCCESS" "DECODING_ERROR" "FIELD_VIOLATION" "EMPTY_REQUEST" "AUTHORIZATION_ERROR" "RESOURCE_NOT_FOUND" "INDEX_NOT_FOUND" "CLIENT_CALL_ERROR" "GENERIC_ERROR" "EXTRA_DETAIL" "THROTTLED_REQUEST"
5	status.details.detailType	Type of detail	"SERVER_ERROR" "CLIENT_ERROR" "WARNING" "INFO"
6	status.details.message	Message describing the specific detail information	"resourceType: SAILING, message: not found"

7	groupBestPrices.groupId	Identifier for a Group	367373
8	groupBestPrices.allocatedCategoryBestPrices.stateroomCategoryCode	Stateroom category for which the best price is applicable	"S1"
9	groupBestPrices.allocatedCategoryBestPrices.bestRate.stateroomCategoryCode	Stateroom category for which the best rate is applicable	"S1"
10	groupBestPrices.allocatedCategoryBestPrices.bestRate.guaranteeCategoryFlag	Flag that indicates if the category contains only GTY spaces	true - if the category contains only GTY space false - if the category contains physical staterooms
11	groupBestPrices.allocatedCategoryBestPrices.bestRate.stateroomSuperCategory	super category (cabin class) code for the category	"I" – Inside "O" – Outside "B" – Balcony "D" – Deluxe "A" – Aqua "C" – Concierge
12	groupBestPrices.allocatedCategoryBestPrices.bestRate.stateroomTypeCode	Code representing the type of the stateroom	"SI" – Standard Inside "LO" – Large Outside "DO" – Deluxe Outside
13	groupBestPrices.allocatedCategoryBestPrices.bestRate.restrictedPromotionApplied	Flag that indicates if a restricted promotion is applied	true false
14	groupBestPrices.allocatedCategoryBestPrices.bestRate.accessibleStateroomExistFlag	Flag that indicates if there is a minimum of 1 accessible stateroom available	true - when there is a minimum of 1 accessible stateroom available false - when there is no accessible stateroom available
15	groupBestPrices.allocatedCategoryBestPrices.bestRate.refundableFareFlag	Flag that indicates if all promotions are refundable.	true - when all the promotions are refundable type false - when minimum of 1 promotion that is non-refundable
16	groupBestPrices.allocatedCategoryBestPrices.bestRate.appliedBasePriceId	Identifier of the Base Price applied	"I5810777"

17	groupBestPrices.allocatedCategoryBestPrices.bestRate.basePriceShortDescription	Description of applied base price	"STANDARD"
18	groupBestPrices.allocatedCategoryBestPrices.bestRate.basePriceType	Type of applied base price	"S"
19	groupBestPrices.allocatedCategoryBestPrices.bestRate.appliedPromotionIds	List of promotions applied	["G0737880", "J1426691"]
20	groupBestPrices.allocatedCategoryBestPrices.bestRate.promoCodeApplied	Flag indicates if the applied promo code is of type 'T' (targeted offer)	true - if applied promo code type = "T" (Targeted Offer) false - if applied promo code type = "O" (Non-Targeted Offer)
21	groupBestPrices.allocatedCategoryBestPrices.bestRate.leadPromotion.promotionId	Identifier of the lead promotion	"G0737880"
22	groupBestPrices.allocatedCategoryBestPrices.bestRate.leadPromotion.shortDescription	Description of the lead promotion	"BOGO60 NRD"
23	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.guestSequenceId	Guest sequence number, starting from 1 up to the total occupancy requested	1 2 3 4
24	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.appliedLifeStage	Indicates the life stage of the guest	"A" – Adult "C" – Child "I" – Infant "S" – Senior
25	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.netTotal	Average net total amount per guest	1200.00
26	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.includedInNetTotal	Components that are included in the Total Amount	"CFARE" "NCCF" "TAXF" "PPGR"
27	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.netCruiseFareAmount	Guest level - net package Cruise Fare after applying the promotion discounts	4279.00
28	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.nonComissionalCruiseFareAmount	Guest level - Non commissionable cruise fare amount applicable to the corresponding	170.00

		guest in the booking after applying the promotion discounts	
29	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.taxesAndFeesAmount	Guest level - Taxes and Fees charges	140.76
30	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.gratuityAmount	Guest level - Gratuity charges	39.90
31	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.netDiscountAmount	Average net discount amount per guest	250.00
32	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.valueAdds.currencyCode	Guest level - OBC (Value add) currency	"USD"
33	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.valueAdds.amount	Guest level - Value add OBC amount	300.00
34	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.valueAdds.type	Guest level - Type of the value add	"OBC"
35	groupBestPrices.allocatedCategoryBestPrices.bestRate.averagePerGuestPricePoint.originalAmount	Original amount per guest, to be used for brochure or strikethrough price	1706.60
36	groupBestPrices.allocatedCategoryBestPrices.bestRate.guestPricePoints.guestSequenceId	Guest sequence number, starting from 1 up to the total occupancy requested	1 2 3 4
37	groupBestPrices.allocatedCategoryBestPrices.bestRate.guestPricePoints.appliedLifeStage	Indicates the life stage of the guest	"A" – Adult "C" – Child "I" – Infant "S" – Senior

153	groupBestPrices.allocatedCategoryBasePrices.bestValue.averagePerGuestPricePoint.valueAdds.currencyCode	Guest level - OBC (Value add) currency	"USD"
154	groupBestPrices.allocatedCategoryBasePrices.bestValue.averagePerGuestPricePoint.valueAdds.amount	Guest level - Value add OBC amount	300.00
155	groupBestPrices.allocatedCategoryBasePrices.bestValue.averagePerGuestPricePoint.valueAdds.type	Guest level - Type of the value add	"OBC"
156	groupBestPrices.allocatedCategoryBasePrices.bestValue.averagePerGuestPricePoint.originalAmount	Original amount per guest, to be used for brochure or strikethrough price	1706.60
157	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.guestSequenceId	Guest sequence number, starting from 1 up to the total occupancy requested	1 2 3 4
158	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.appliedLifeStage	Indicates the life stage of the guest	"A" – Adult "C" – Child "I" – Infant "S" – Senior
159	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.netTotal	Net total amount per guest	1200.00
160	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.includedInNetTotal	Components that are included in the Total Amount	"CFARE" "NCCF" "TAXF" "PPGR"
161	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.netCruiseFareAmount	Guest level - net package Cruise Fare after applying the promotion discounts	4279.00

162	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.nonComissionalCruiseFareAmount	Guest level - Non commissionable cruise fare amount applicable to the corresponding guest in the booking after applying the promotion discounts	170.00
163	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.taxesAndFeesAmount	Guest level - Taxes and Fees charges	140.76
164	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.gratuityAmount	Guest level - Gratuity charges	39.90
165	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.netDiscountAmount	Net discount amount per guest	250.00
166	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.valueAdds.currencyCode	Guest level - OBC (Value add) currency	"USD"
167	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.valueAdds.amount	Guest level - Value add OBC amount	300.00
168	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.valueAdds.type	Guest level - Type of the value add	"OBC"
169	groupBestPrices.allocatedCategoryBasePrices.bestValue.guestPricePoints.originalAmount	Original amount per guest, to be used for brochure or strikethrough price	1706.60
170	metaInfo.bookingChannel	Booking channel used for pricing	"PI"
171	metaInfo.effectiveDateTime	Effective date and time of pricing	20230522142622

12.9 Promotion Details Request

Parameter	Parameter Type	Description	Required	Example Value
bookingChannel	Body attribute	Code used to represent the booking channel of the agency	No Default: "PI"	"PI"
client	Object	Contains client attributes	No (market object)	N/A

			required if not passed)	
client.agencyId	Body attribute	Code used to represent the ID of the agency	No (market.officeCode and market.countryCode must be populated and market.currencyCodes must not be empty or null if client is not passed)	1000
client.currencyCodes	Array	Code used to represent the currency which the agency may book in	No	"USD"
market	Object	Contains market attributes	No (client object required if not passed)	N/A
market.officeCode	Body attribute	Code used to represent the office to which the partner agency is affiliated with	No (client.agencyId must be populated if market is not passed)	"MIA"
market.countryCode	Body attribute	Code used to represent the country of the booking	No (client.agencyId must be populated if market is not passed)	"USA"
market.currencyCodes	Array	Code used to represent the currency in which the booking will be made	No (client.agencyId must be populated if market is not passed)	"USD"

brand	Body attribute	Code used to represent the brand of the ship	Yes	"R" – Royal "C" – Celebrity
-------	----------------	--	-----	--------------------------------

12.10 Promotion Details Response

	Field	Description	Example Value
1	status.httpStatus	The http response status	"OK"
2	status.dateTime	Date and time response was sent	"2023-04-21T00:29:37.307239"
3	status.details.code	Number identifier for detail	1005
4	status.details.codeDescription	Description of the code	"PARTIAL_CONTENT_SUCCCESS" "DECODING_ERROR" "FIELD_VIOLATION" "EMPTY_REQUEST" "AUTHORIZATION_ERROR" "RESOURCE_NOT_FOUND" "INDEX_NOT_FOUND" "CLIENT_CALL_ERROR" "GENERIC_ERROR" "EXTRA_DETAIL" "THROTTLED_REQUEST"
5	status.details.detailType	Type of detail	"SERVER_ERROR" "CLIENT_ERROR" "WARNING" "INFO"
6	status.details.message	Message describing the specific detail information	"resourceType: PROMOTION, message: not found"
7	promotions.id	Identifier for a promotion	"G9758747"

8	promotions.shortDescription	Short description of a promotion	"BONUS NRD"
9	promotions.longDescription	<i>To be used in the future</i>	
10	promotions.brand	Code used to represent the brand of the promotion	"R"
11	promotions.startDateTime	Starting date and time of promotion	20210422165000
12	promotions.endDateTime	Ending date and time of promotion	99991231235959
13	promotions.typeCode	Code representing the type of the promotion	"C" "D"
14	promotions.subTypeCode	Code representing the subtype of the promotion	"OO" "CV"
15	promotions.promotionClassType	Identifier of the class type of the promotion	"DSC"
16	promotions.targetedOfferType	Type of targeted offer	"GENERIC" "UNIQUE_RESTRICTED_LIMITED_USE" "UNIQUE_UNRESTRICTED" "UNIQUE_UNRESTRICTED_LIMITED_USE"
17	promotions.refundableType	Code representing refundable or non-refundable type	"D" "R"
18	promotions.sailingRestricted	Flag that indicates if sailing qualifiers exist.	true false
19	promotions.categoryRestricted	Flag that indicates if Category/Super category qualifier exists at root and/or sailing level.	true false
20	promotions.occupancyRestricted	Flag that indicates if	true false

		Occupancy qualifier exists.	
21	promotions.occupancyRestriction	Represents the number of occupancies for which the promotion is eligible	1 2 3 4
22	promotions.gatewayRestricted	Flag that indicates if gateway qualifier exists.	true false
23	promotions.guestRestricted	Flag that indicates if guest qualifiers with qualifying criteria or loyalty qualifier exists.	true false
24	promotions.promoCodeRestricted	Flag that indicates if promotion level promo code exists.	true false
25	promotions.promotionGuestRestrictions.loyaltyRestriction	Flag that indicates if loyalty qualifier exists.	true false
26	promotions.promotionGuestRestrictions.ageRestriction.min	Indicates the minimum guest age eligible for the promotion.	18
27	promotions.promotionGuestRestrictions.ageRestriction.max	Indicates the maximum guest age eligible for the promotion.	40
28	promotions.promotionGuestRestrictions.residencyCodes	Represents the residential state(s)/province(s) for which the promotion is eligible	"FL"
29	promotions.promotionGuestRestrictions.publicServices	Represents the occupation of the guest for whom the promotion is eligible	"F"
30	promotions.promotionGuestRestrictions.lifeStages	Indicates the life stage of the guest for whom the promotion is eligible	"A" = Adult "C" = Child "I" = Infant

			"S" = Senior
31	promotions.agencyTypes	Indicates the agency types eligible for the promotion.	"NET_RATE" "INTERLINE_RATE:"

12.11 Price Change Identifications – Super Category Request

Parameter	Parameter Type	Description	Required	Example Value
client	Object	Contains client attributes	No (market object required if not passed)	N/A
client.agencyId	Body attribute	Code used to represent the ID of the agency	No (market.off iceCode and market.cou ntryCode must be populated and market.cur rencyCodes must not be empty or null if client is not passed)	1000
client.currencyCodes	Array	Code used to represent the currency which the agency may book in	No	"USD"
market	Object	Contains market attributes	No (client object required if not passed)	N/A
market.officeCode	Body attribute	Code used to represent the office to which the partner agency is affiliated with	No (client.age ncyId must be populated if market is not passed)	"MIA"
market.countryCode	Body attribute	Code used to represent the country of the booking	No (client.age	"USA"

			ncyld must be populated if market is not passed)	
market.currencyCodes	Array	Code used to represent the currency in which the booking will be made	No (client.age ncyld must be populated if market is not passed)	"USD"

9	keys.packageCode	Sailing package code	"RD11BJ04"
10	dateTimeRange.fromDateTime	The starting date and time of changes captured	"2023-05-25T18:58:08.428Z"
11	dateTimeRange.toDateTime	The ending date and time of changes captured	"2023-05-25T18:58:08.428Z"

13 Appendix B

13.1 Error Handling

Code Description	Code
PARTIAL CONTENT SUCCESS	1000
DECODING ERROR	1001
FIELD VIOLATION	1002
EMPTY REQUEST	1003
AUTHORIZATION ERROR	1004
RESOURCE NOT FOUND	1005
INDEX NOT FOUND	1006
CLIENT CALL ERROR	1007
GENERIC ERROR	1008
EXTRA DETAIL	1009
THROTTLED REQUEST	1010
TIME OUT	1011
SAILING SOLD OUT	2XXX
SAILING NOT FOUND	2XXX

Detail Type
SERVER ERROR
CLIENT ERROR
WARNING
INFO

Sample Sailing Sold Out response:

```
{
  "code": xxxxx, (to be replaced with new code, create new series as '2XXX')
  "codeDescription": "SAILING SOLD OUT",
  "detailType": "INFO",
  "message": "Sailing is Sold Out"
}
```

Sample Sailing Not Found response:

```
{
  "code": xxxxx, (to be replaced with new code, create new series as '2XXX')
  "codeDescription": "SAILING NOT FOUND",
  "detailType": "INFO",
  "message": "Sailing Package Invalid or Inactive"
}
```

If the error in the response is RESOURCE_NOT_FOUND and no pricing returned, for now agencies should consider the sailing to be sold out.

Agency can skip/ignore these errors. They should not remove the sailing from their cache.

14 Appendix C

14.1 Enhancements 2024

14.1.1 Purpose

This document describes the 2024 Enhancements scheduled for the RCG VPS Product and its services. It outlines the information required for the RCG VPS Partners to assess any impact on their respective systems and perform high-level design activities. The changes mentioned in this advisory are available now in the test environment and the production environment by **July 1, 2024**.

14.1.2 Overview

The key initiative for 2024 is the new legislation by the State of California to show the pricing inclusive of all mandatory fees.

To comply with the new legislation by the State of California to show pricing inclusive of all mandatory fees, RCG will be making changes to the VPS Pricing services to include the Taxes & Fees component in the price returned for the **U.S. market**.

Currently, the price includes the Cruise Fare and the Non-Commissionable Cruise Fare (NCCF) components. The services will be enhanced to include the Taxes & Fees component in the total price.

This document lists all the services that are impacted.

14.1.3 Disclaimers

Please contact VPS Support team at vps-partner-support@rccl.com, for any support needs regarding the project's functional requirements.

14.1.4 Enhancement Summary

- No changes to the existing schema definitions.
- Response attribute “includedInNetTotal”, which lists components included in the total amount for each price point returned will have ‘TAXF’ as a component in addition to ‘CFARE’ and ‘NCCF’ for the **U.S. market**.

14.1.5 Services Impacted by 2024 Enhancements

MESSAGE	SCOPE	RQ IMPACT	RS IMPACT	IMPACT DESCRIPTION
Category Pricing	Existing	NA	X	Response: “includedInNetTotal” attribute of all price point returned will have ‘TAXF’ in addition to ‘CFARE’ and ‘NCCF’ components for the U.S. market.
Super Category pricing	Existing	NA	X	
Group Pricing	Existing	NA	X	

14.2 Category Pricing

14.2.1 Change Overview

This service will be enhanced to include Taxes and Fees as part of the Cruise Fare component, to support the new legislation for the U.S. market. There are no changes for all the other markets.

14.2.2 Sample Response

The screenshot below is a snippet of a response showing the net total amount that includes the taxes and fees and the attribute “includedInNetTotal” with ‘TAXF’ element.

```
    "includedInNetTotal": [

14.3 Super Category Pricing

14.3.1 Change Overview

This service will be enhanced to include Taxes and Fees as part of the Cruise Fare component, to support the new legislation for the U.S. market. There are no changes for all the other markets.

14.3.2 Sample Response

The screenshot below is a snippet of a response showing the net total amount that includes the taxes and fees and the attribute “includedInNetTotal” with ‘TAXF’ element.
