Response Time and System Availability

The API response time shall be 2 seconds or less measured to the network firewall for at least 90% of all responses.

The scheduled downtime for the VPS and the Licensee System including VPS is as follows:

- A scheduled maintenance outage of up to three (3) hours per quarter, between 9:00 pm and 9:00 a.m. Eastern Time on a Saturday night to Sunday morning.
- Business hours are all times not included in the scheduled downtime above. During business hours, the goal for the VPS System is greater than 99% availability. Availability will be measured over a rolling six-month period.
